Ref.: Comment regarding RM-10620

I support the petition submitted and I would even further reduce or completely eliminate the time requirement. Novice and Advanced class licenses are no longer a part of the restructured FCC licensing system for amateur radio. Clean the slate so to speak and upgrade the Novice and Advanced class holders to the next higher license class. Will upgraded novice class operators be "bad" technician class operators ? I do not think so. Will upgraded advanced class operators be "bad" extra class operators ? I do not think so.

Just get it over with and let's move on... we have more important things to worry about these days than that.

Sincerely yours,

Thorsten Prutz
